## Handling Instructions Medication Shipments

### Thermal Box

1. You will get a pre-conditioned thermal box with an already started Logger inside
2. Open the box and remove the Lid and let the logger inside
3. Place the medication inside
4. Close the coolframe set with the top PCM item, see image
5. Place your documents on the top of the closed coolframe set
6. Close the box
7. Attach the GNN waybill to the box

### Temperature Logger - Start

1. **The logger is already started and you don't need to do anything**
